### **DETAILED ACTION**

The response of 11/18/2005 has been considered and entered in the record. The rejection in view of the Song et al reference (US 6,781,651) has been withdrawn in view of Applicants amendments. The following obviousness double patenting rejection is made. Since the Examiner used the incorrect statutory language in the previous Office action, this Office action is a NON-Final rejection.

### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-13 and 15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21

Art Unit: 2812

of copending Application No. 10/690,270. Although the conflicting claims are not identical, they are not patentably distinct from each other because, it would be obvious to one of ordinary skill in the art, at the time of the invention, that the present claims are encompassed by the claims of 10/690,270, as the claims of 10/690,270 require, data lines, scanning lines, electrodes, storage capacitors, thin film transistors and nitride layers along the data line along with a nitride film comprising an aperture and an electrode below and above its surface.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
